Dogmar Godowsky

Dogmar Godowsky, the charming daughter of Godowsky, the famous pianist, is reported to be making her mark as a "movie" star, much to the satisfaction of the throngs of picture theater patrons.

A LINE O' CHEER

By John Kendrick Bangs.

RELIEF

I LOVE to hear the joyous ring of children's laughter as they play.
 I love to list to birds that sing.
 Their welcome to the newborn day.
 For in a world that's ever sad,
 And weighted down with grievous woes,
 Hope springs from out the heart
 Of laughing children and of old.

ROTARY CLUBS GIVE FRIENDLY PRESENTATION

(By Associated Press)

YORK, England, Aug. 3.—Presentations of silken American flags to British Rotary clubs as a token of Anglo-Saxon friendship are of growing frequency throughout England and the custom is spreading into Scotland and Wales, according to newspaper accounts.

One of the most recent gifts of this kind, "an earnest token of the friendship and fellowship America bears to Great Britain," was presented to the York Rotary club by Luther Stark of Orange, Texas, vice-president of the International Association of Rotary Clubs. The lord mayor of York, Alderman E. Walker, in accepting the Stars and Stripes on behalf of the York club, expressed "the appreciation and pleasure" of the recipients and said it was such a tie as would help to bind still closer the English-speaking peoples of the world.

SKELETON IS FOUND 6000 YEARS OF AGE

(By Associated Press)

FLAGSTAFF, Ariz., Aug. 3.—Several Harvard students recently found in the Battika Indian ruins near here a skeleton believed to be 6000 years old. The skeleton, said to be a well-preserved specimen, is thought to be that of a "post-basket-weaver" Indian who lived before the cliff dwellers.

The ruins are located in a canyon cave, which affords them protection from the elements. There are about 80 houses in this ancient city, most of which are well preserved.

SOFIA HAS IDEA FOR CRUSHING SMALL PAPERS

(By Associated Press)

SOFIA, Aug. 3.—The government has just presented to parliament a bill establishing a monopoly for all newspaper advertisements. Henceforth every advertisement, announcement or puff will have to be published first in the Official Gazette at a very high price.

Then only its reproduction in other papers will be allowed after paying another tax for the reproduction. The big political papers and those for information supported chiefly by advertisements are in the hands of the intellectuals of the middle class who are not on good terms with the present government. By this method the government would be able to injure the organs of its political adversaries.

COAL MINERS LOSE CHANCE OF LIFETIME

(By Associated Press)

COPENHAGEN, Aug. 3.—"The United States lost a great opportunity to sell her surplus coal," a leading Danish importer told the Associated Press correspondent here recently, "because in 1919 and 1920 when American sellers had the European market at their mercy, they made the mistake of sending to Europe coal of very poor quality and charged exorbitant prices for it."

As a result of this policy, he said, during the recent British coal strike, when practically no coal was obtainable from Great Britain, hardly any Scandinavian orders for coal were placed in America despite the fact that stocks on hand were nearly exhausted. Importers preferred to run the risk of running short to taking their chances of ordering fuel from America and receiving coal of an inferior quality. "If American coal is to regain the reputation it has lost in European markets there must be an effective official guarantee of its quality based on analysis," says the bureau of mines.

RANGERS LEARN INTRICACIES OF VARIOUS AUTOS

(By Associated Press)

YOSEMITE, Cal., Aug. 3.—Forest rangers of the Yosemite national park are being given courses in automobile work so they can help repair machines they find stranded along the park roads.

Orders recently issued by Park Superintendent Lewis provide that every first class patrolling ranger shall put in at least three weeks in the government garage here.

"The new motor school is part of our effort to make everybody's stay in Yosemite free from accident and a pleasant memory," Chief Ranger Townsley explained recently.

Simple motor trouble is apt to happen in any automobile and the average driver knows nothing about repair work. Instead of sending 15 or 20 miles for a rescue car, the nearest patrolling ranger will be able to start the defect in short order.

Every car will go out prepared to remedy the motor running again or at least diagnose the trouble so that the re-

COUNT KAROLYI OF HUNGARY IS INVESTIGATED

(By Associated Press)

BUDAPEST, Aug. 3.—Count Bethlen, the Hungarian premier, has set in motion an investigation of the various acts of which Count Michael Karolyi, "the grand old man of Hungary," now an exile from his native land, stands accused. These include the allegation of high treason made before the national assembly by Prince Louis Windischgraetz in connection with the organization of the Hungarian revolution.

Several members of the independence party are involved in the same accusation which is based partly upon the text of memorandums that Karolyi is declared to have addressed to the entente governments during the war.

Prince Windischgraetz cites Clemenceau's replies to interpellations in the chamber of deputies, in which the French premier said he had proof that Karolyi entertained close relations with the soviets. From all the documents and evidence which Windischgraetz has handed over to Premier Bethlen, he deduces that Karolyi volunteered to entente governments to start a revolution in Hungary and that he conspired to that end with revolutionary elements in different countries.

Old shoes are seldom thrown away any more at weddings. There aren't any old shoes any more.

Small dirigible just right for two has been invented in France and is appealing to newswomen. It is natural they should incline toward something that would take them in the direction of the moon.

THE U. S. NOBBY TREAD
 Where the going is specially heavy with snow, mud or sand, in hilly country where maximum traction on the road is a factor, no other tire tread yet devised is quite so effective, or so wholly approved by motoring opinion, as the U. S. Nobby Tread.
 Its very simplicity—three rows of diagonal knobs, gripping the road—is the result of all the years of U. S. Rubber experience with every type of road the world over.

If every one listened to experience, how much they'd save

"Stop and talk to the next man you see with U. S. Tires on his car."

STOP and talk to the next man you see with U. S. Tires on his car. Ask him why.

Most likely you'll hear an interesting story about his tire experiences—before the answer was found. Money wasted. Promises unkept. Trouble on the road—humorous to every one except the man who went through it.

Finally U. S. Tires. And U. S. Tires ever since.

Perhaps it's the experience of U. S. Tire buyers that makes them more emphatic in their preference than ever this year.

When these men have tried most

everything by the way of "staggering bargains", "hurrah discounts", "discontinued lines at less" and so forth they know what not to get.

They want a fresh, live tire. With a good reputation. That's everything it says it is. With the people behind it who back it up.

There are 92 U. S. Factory Branches. Your local U. S. Dealer is drawing upon them continually to keep his stocks sized up, complete—to give you service. Whenever he gets one or a hundred tires from a U. S. Factory Branch, they are newly made this season's tires.

Sold to you at a net price. Full values. Square-dealing. A reputable maker. A reputable dealer. The whole transaction as befits the leadership of the oldest and largest rubber organization in the world.
